

# Kroniske patienters helbred efter otte års homøopatisk behandling?

I et nyt studie fra Tyskland fik 2722 svenske og tyske patienter med kroniske helbredsproblemer homøopatisk behandling af læger med homøopatisk uddannelse.  
Deltagerne fulgtes i en periode på 8 år.

Forskerne konstaterede, at data... "hos patienter i homøopatisk behandling konsekvent viser substantielle helbredsmæssige bedringer vedvarende i hele observationsperioden."  
Nogle af de mere interessante observationer fra studiet er:

- \* 1 ud af 2 patienter berettede om 50% forbedring eller mere af deres helbredsmæssige tilstand
- \* 3 ud af 10 patienter stoppede den homøopatiske behandling inden afslutningen af 8-års perioden pga. afgørende forbedringer af deres helbred.
- \* Forbedringerne var mere udtalte hos patienter med mere alvorlig lidelse i begyndelsen af behandlingen.

De fleste patienter sagde, de ville benytte homøopati igen og anbefale til venner.
